

MONZONE POWERLIFT

UNDERMOUNT BI-FOLD, RETRACTABLE TAIL LIFT

PTL-2000 UM

PRODUCT FEATURES

Mechanism

- The retractable under-mount mechanism enables fast setup and secure storage, streamlining operations.
- It supports a payload of up to 2,000kg at CG600mm and powered by four cylinders, with an arm length of 900mm.

Platform

- Designed with a bi-fold structure, the platform folds compactly when not in use, maximizing space while maintaining full functionality
- It includes two long roll-stopper strips for added security
- The auto-tilting function allows the platform to tilt to the ground when the down button is pressed continuously, and to automatically level up when the up button is held, enhancing operational ease

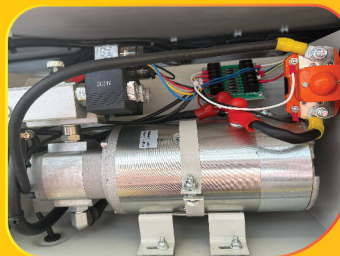

Control

- For user convenience and safety, the tail-lift is operated via a standard panel joystick, two-leg safety foot switch, and a wireless remote control, providing a seamless and intuitive interface.

Additional Features

- 2.8km hydraulic motor for smoother and more safer lifting, thus increase efficiency and product life
- An additional safety limit switch is installed to prevent the lifting platform from striking the door frames when in the parked position
- Left and right side safety valves to prevent lifting platform fail and drop due to hydraulic leakage or power failure
